

HIV PREVENTION

At OHMaSS we use social marketing and research to drive change. Targeting vulnerable populations, we provide voluntary counseling and testing services, and conduct education campaigns through peer educators and *cinemobile* to encourage healthy sexual behaviors.

In Haiti:

Haiti has the **highest** HIV prevalence rate in the **Caribbean** with a prevalence rate of **2.2 %** among the general population*

Among Haiti's most **vulnerable** populations, **Sex workers (FSW)** have an HIV rate of **8.7%****

Men who have sex with men (**MSM**) have the highest HIV rate **at 13%****

The OHMaSS Approach:

We work with the most at risk populations:

MSM

FSW

Youth

Mobile Populations

Since 2013, OHMaSS has reached about **377,720** individuals from **key populations** and have sensitized them in adopting safe sexual behaviors
